Ixopo is a small KwaZulu-Natal town about 85 km south of Pietermaritzburg at the intersection of two national routes. The town forms part of the Harry Gwala District and Ubuhlebezwe Local Municipality, and is the main administrative centre of the municipality and Southern Midlands, and also accommodates the seat of government in the district.

The town is surrounded by a picturesque rural area, with rolling hills covered in sugarcane and plantations. Both these products are key to the town's survival. It also offers an array of activities for eco-tourists. Although small, it provides a variety of services to businesses and the surrounding area. Therefore it can be classified as a central place town.

In Ixopo the summers are comfortable, wet, and partly cloudy and the winters are short, cold, and mostly clear. Average monthly temperature ranges from 19.5°C in February to 11.1°C in June. The town normally receives about 712mm of rain per year, with most rainfall occurs during mid-summer.

Ixopo is 'n klein KwaZulu-Natale dorpie sowat 85 km suid van Pietermaritzburg by die kruising van twee nasionale roetes. Die dorp vorm deel van die Harry Gwala Distrik en Ubuhlebezwe Plaaslike Munisipaliteit, en is die hoof-administratiewe sentrum van die munisipaliteit en Suidelike Middellande, en akkommodeer ook die setel van die distriksregering.

Die dorp word omring deur 'n skilderagtige landelike gebied, met golwende heuwels wat bedek is met suikerriet en plantasies. Albei hierdie produkte is die sleutel tot die dorp se voortbestaan. Dit bied ook 'n verskeidenheid aktiwiteite aan ekotoeriste. Alhoewel klein, lewer die dorp 'n verskeidenheid dienste aan besighede en die omliggende gebied. Daarom kan dit as 'n sentraleplekdorp geklassifiseer word.

In Ixopo is die somers aangenaam, nat en gedeeltelik bewolk en die winters is kort, koud en meestal mooiweer. Gemiddelde maandelikse temperatuur wissel vanaf 19.5°C in Februarie tot 11.1°C in Junie. Die dorp ontvang normaalweg sowat 712mm reën per jaar, met die meeste reënval wat gedurende die mid-somer voorkom.
